ProCool (Heat Transfer Fluid)

1. Product and Company Identification

<table>
<thead>
<tr>
<th>Name of Product:</th>
<th>ProCool™, ProCool™-50, ProCool™-30 (includes all concentrations/dyes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Synonyms:</td>
<td>Propylene Glycol Mixture</td>
</tr>
<tr>
<td>Chemical Name/Class:</td>
<td>Mixture</td>
</tr>
<tr>
<td>CAS No.:</td>
<td>Not applicable to mixtures</td>
</tr>
<tr>
<td>Emergency Phone:</td>
<td>1-800-424-9300 (CHEMTREC)</td>
</tr>
</tbody>
</table>

| Product Use:       | Heat Transfer Fluid                                                  |
| Producer:         | Dynalene, Inc.                                                        |
| Distributor Name: | Alternate Energy Systems, Inc.                                        |
| Address:          | 210 Prospect Park, Peachtree City, GA 30269, USA                    |
|                   | Tel: 1-770-487-8596                                                  |

2. Hazards Identification

| Hazard Statements: | H315 Causes skin irritation Category 2 |
|                   | H320 Causes eye irritation Category 2B |

| Precautionary Statements: | P624 Wash skin thoroughly after handling. |
|                          | P280 Wear protective gloves/eye protection/face protection. |
|                          | P501 Dispose of contents/container in accordance with local/regional/national/international regulations. |

GHS Pictogram: Warning!

3. Composition/Information on Ingredients

4. First Aid Measures

Skin Exposure: If this product contaminates the skin, immediately begin decontamination with running water. Remove exposed or contaminated clothing, taking care not to contaminate eyes. The minimum recommended flushing time is 15 minutes. Contaminated individual must seek immediate medical attention, especially if irritation or redness develops.

Eye Exposure: If this product enters the eyes, open victim’s eyes while under gentle running water. Use sufficient force to open eyelids. Have victim “roll” eyes. Minimum flushing is for 15 minutes. Contaminated individual must seek immediate medical attention, especially if symptoms persist.

Inhalation: If vapors or mists of this product are inhaled, remove victim to fresh air. If necessary, use artificial respiration to support vital functions. Remove or cover gross contamination to avoid exposure to rescuers.

Ingestion: Hazards from swallowing this product is not expected to be serious. If symptoms develop, seek medical attention.
5. Fire Fighting Measures

Fire Extinguishing Materials:
Water spray, carbon dioxide, foam, dry chemical, Halon, any "ABC" class.

Unusual Fire and Explosion Hazards:
This product must be substantially pre-heated before ignition can occur. When involved in a fire, this material may decompose and produce irritating vapors and toxic gases (e.g., carbon oxides).

Special Fire Fighting Procedures:
Incipient fire responders should wear eye protection. Structural fire fighters must wear Self- Contained Breathing Apparatus and full protective equipment. Move fire-exposed containers if it can be done without risk to firefighters. If possible, prevent run-off water from entering storm drains, bodies of water, or other environmental areas. Decontaminate fire-response equipment with soap and water solution if necessary.

6. Accidental Release Measures

Spill and Leak Response:
Uncontrolled releases should be responded to by trained personnel using pre-planned procedures. Proper protective equipment should be used. In case of an uncontrolled release, clear the affected area, protect people, and respond with trained personnel.

Small Spill:
Cover with absorbent material (floor absorbent, vermiculite, etc.). Soak up spill and place material into a drum.

Large Spill:
Personnel involved with large releases should wear protective equipment. Stop spill at source, dike the area surrounding the spill to prevent further exposure. Prevent material from entering sewer system. If pump is available, pump spilled material into 55-gallon drums for proper disposal. If necessary, absorbents such as vermiculite, clay floor absorbent may be used on spill and shoveled into drums.

7. Handling and Storage

General Hygiene Considerations:
Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the day.

Storage and Handling Practices:
All employees who handle this material should be trained to handle it safely. Use in a well-ventilated location. Open drums and other containers of this product slowly, on a stable surface. Drums and other containers of this product should be properly labeled. Empty drums and containers may contain residual amounts of this product, therefore, empty containers should be handled with care. Move drums of this product carefully, with the appropriate drum-handling equipment. Store drums and other containers in cool, dry locations, away from direct sunlight, or sources of intense heat. Storage areas should be made of fire-resistant materials. Keep containers away from incompatible chemicals.

Protective Practices During Maintenance of Contaminated Equipment:
Make certain application equipment is locked and tagged-out safely, if necessary. Decontaminate equipment using soapy water before maintenance begins.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:
- OSHA Permissible Exposure Limit (PEL): none established
- OSHA Short Term Exposure Limit (STEL): none established
- ACGIH Immediately Dangerous to Life or Health (IDLH): none established
- ACGIH Threshold Limit Value (TLV): none established
- ACGIH Short Term Exposure Limit (STEL): none established

Ventilation and Engineering Controls:
Use with adequate ventilation to minimize exposure to mists or sprays of this product. Prudent practice is to ensure eyewash/safety shower stations are available near areas where this product is used. Monitoring of oxygen level is recommended. Decontaminate the area thoroughly. If necessary, decontaminate spill response equipment with soap and water solution.
Respiratory Protection: None needed for normal circumstances of use. If respiratory protection is needed, use only protection authorized in 29 CFR 1910.134, or applicable State regulations. Use supplied air respiration protection if oxygen levels are below 19.5% or are unknown.

Eye Protection: Wear safety glasses with side shields.

Hand Protection: Wear butyl rubber, natural rubber, neoprene, Nitrile rubber, or other suitable gloves for routine industrial use.

Personal Protective Equipment Level: D

10. Stability and Reactivity

Stability: Stable under ordinary conditions of use and storage.

Hazardous Decomposition Products: Mainly carbon dioxide and carbon monoxide.

Materials With Which Substance Is Incompatible: Strong oxidizers, strong acids, acid chlorides, acid anhydrides, chloroformates, or strong reducing agents.

Hazardous Polymerization: Will not occur.

Conditions to Avoid: Contact with incompatible chemicals and exposure to extremely high temperatures.

6630 mg/kg

Suspected Cancer Agent
This product’s ingredients are not found on the following lists:
FEDERAL OSHA Z LIST, NTP, IARC, CAL/OSHA, and therefore is not considered to be, nor suspected to be cancer causing agents by these agencies.

Irritancy of Product:
This product may cause irritation to contaminated tissues.

Reproductive Toxicity Information:
This product is not reported to produce mutagenic, embryotoxic, teratogenic, or reproductive effects in humans.

Medical Conditions Aggravated By Exposure:
It is anticipated that mainly skin and eye disorders may be aggravated after over-exposure.

Recommendations to Physicians:
Treat symptoms and eliminate over-exposure.

Biological Exposure Indices:
Currently, there are no Biological Indices (BEIs) associated with the components of this product.

12. Ecological Information

Environmental Stability:
The components of this product will be degraded over time into organic compounds.

Effect of Material on Plants or Animals:
This product may be harmful to aquatic life if large quantities are released into bodies of water.

Effect of Chemical on Aquatic Life:
This product may be harmful to aquatic life if large quantities are released into bodies of water.

13. Disposal Considerations

Waste disposal must be in accordance with appropriate Federal, State, and local regulations. This product, if unaltered by use, may be disposed of by treatment at a permitted facility or as advised by your local hazardous waste regulatory authority.
14. Transportation Information

Proper Shipping Name: Not applicable.
UN Number: Not applicable.
Packing Group: Not applicable.
Labels Required: Not applicable.

Marine Pollutant: No component of this product is listed as a Marine Pollutant (49 CFR 172.101, Appendix B).
Transport Canada Transportation of Dangerous Goods Regulations: This material is not considered as dangerous goods.

15. Regulatory Information

SARA Reporting Requirements: The components of this product are not subject to the reporting requirements of Sections 302, 304 and 313 of Title III of the Superfund Amendments and Reauthorization Act.
TSCA Inventory Status: The components of this product listed in Section 3 are on the TSCA Inventory.

16. Other Information

Revision Date: 06 October 2014
This MSDS was prepared by: Alternate Energy Systems, Inc., using data provided by Dynalene, Inc.

The information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Dynalene Heat Transfer Fluids or Alternate Energy Systems, Inc. assume no responsibility for injury to the vendee or third persons proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Additionally, Dynalene Heat Transfer Fluids or Alternate Energy Systems, Inc. assume no responsibility for injury to vendee or third persons proximately caused by abnormal use of the material even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in his use of the material.
